PROFESSIONAL SUMMARY

BCA student (expected graduation 2027) seeking a Data Scientist or Data Analyst entry-level role. Working knowledge of Python and SQL for data retrieval, cleaning, and analysis. Uses NumPy, Pandas, and Matplotlib to explore datasets and visualize patterns, and Excel and Power BI (basics) to present findings. Motivated to turn business problems into data-backed decisions. Comfortable with Git, GitHub, and AI-assisted coding tools.

TECHNICAL SKILLS

Programming & Databases:	Python, SQL
Data Analysis & Visualization:	Pandas, NumPy, Matplotlib, Data Analysis, Data Visualization
BI & Reporting Tools:	Power BI (Basics), MS Excel, MS Office
Development Tools:	Git, GitHub
AI-Assisted Development:	AI-Assisted Coding and Debugging, AI Agent Workflows
Analytical Skills:	Data Cleaning, Business Problem Solving, Data-Driven Decision Making

EDUCATION

Bachelor of Computer Applications (BCA) | Expected Graduation: 2027
S. S. Jain Subodh P.G. Autonomous College

CAREER OBJECTIVE

To start my career in a data-driven team where I can apply Python, SQL, and analytics fundamentals to real business problems, learn how analysis supports business decisions, and grow through hands-on work with experienced data professionals.
